UserWay widget on the Sciendo platform

A growing number of organizations recognize the responsibility for providing barrier-free digital access. Everyone, including people with disabilities, should be able to read and use the content provided on the websites. Sciendo recognizes this growing necessity, partnering with UserWay and installing the UserWay widget on its platform.

The UserWay widget provides multiple options for all types of accessibility issues: text increase, contrast enhancement, font style change to make it dyslexia friendly, adjustment of the cursor size, screen reader that reads the text available on the website aloud, and much more.

With the widget, you can now adjust the website according to your own needs and preferences. You can find it at the bottom of the page, under “Accessibility Menu”. The widget complies with all the ADA (Americans with Disabilities Act) and WCAG (Web Content Accessibility Guidelines) requirements and is widely used by companies like UNICEF, Disney, Coca-Cola, or Nespresso.

We are hoping that you and your readers will benefit from this best-in-class accessibility solution.

Journal Citation Indicator

In 2021 Clarivate introduced a new metric called Journal Citation Indicator, a field-normalized measurement of journal citation impact.

The Journal Citation Indicator has been calculated for all journals in the Web of Science Core Collection, including those that do not have the Impact Factor. As a result, journals indexed in The Emerging Sources Citation Index have become available in the Journal Citation Reports and have received their own citation metric for the first time.

There are several key differences between the Journal Citation Indicator and the Impact Factor:

- the Journal Citation Indicator's calculation on three years of publications contrasts with the two-year window employed for the JIF.
- the Impact Factor calculation is based on citations made in the current year, while the Journal Citation Indicator counts citations from any time period following publication, up to the end of the current year.

Sciendo's technical team is in process of adding the metric to your journal's website. Below, you can find the details regarding the Journal Citation Indicator obtained by your title.

White Label Publishing House

Sciendo prepared a special offer for universities and other organizations that are seeking a partner to publish all or some of their journals, monographs, textbooks, edited volumes and other publications in English, German, French, Spanish, Italian and Polish.

The service applies to new publications and to previously published books and back journal volumes. If the value of the contract exceeds an agreed amount, the university can enjoy discounts up to 60% on standard fees.

Usage Statistics

Journal Page Clicks		
Journal Page	Page clicks	Unique clicks
Product page	423	419
Content page	6265	6173

Article downloads
30678

Product page – the main page of the journal, where cover, its description and supplementary materials are located.

Content page – the archive, with issues and articles.

Clicks – the total number of times a specific website has been accessed by users, including also returning users. Page impression happens anytime a page is loaded through the browser.

Unique clicks – the total number of times a specific website has been accessed by individual users. Users are determined by the IP address of a computer or device that was used for browsing.
