MARKETING EXTRA  
PLATFORM REDESIGN

## MARKETING EXTRA PACKAGE

In 2016 De Gruyter Open launched the Marketing Extra package, an optional offer, designed to improve the visibility of Society Journals, highlight the latest research and raise the Journal profile in the scholarly community. This offer includes 6 different services. For more information please contact your Account Manager or Marketing Manager (the list of contacts can be found at the end of the Report).

## PLATFORM REDESIGN

From January 2016, De Gruyter has been working on a complete redesign of De Gruyter Online. The objective was to make the platform responsive, and thus easily accessible for all kinds of electronic devices.

The following important steps were successfully completed:

- DG Online is now using the full width of the browser window. If the window is minimized, part of the texts will also get smaller.
- DG Online automatically adjusts itself to the size of the display of the device, so now all publications can be easily read from a tablet or a smartphone.
- The structure of the product and content pages of books and journals has been modified. We merged the previously separate pages into one. This way, the content is more accessible and clearly presented.

## AUTHORS' AFFILIATIONS – NEW REQUIREMENTS:

In 2016 De Gruyter decided to unify the requirements regarding authors' affiliations in order to provide more accurate and complete metadata information to abstracting and indexing services. As of now all of the affiliations except for associated institutions also contain the information about the country name.

De Gruyter implements the list of countries provided by ISO 3166-1 code standard published by the International Organization for Standardization (ISO).

- We would like to ask you kindly to include the country names in affiliations of your authors.
- Important:** ISO 3166-1 uses the country names chosen by the United Nations, some of which are disputed.

International  
Organization for  
Standardization

De Gruyter also currently works on one model of authors' affiliated institutions that will standardize all of the publications on the platform. Application of this unified model aims to enhance their recognition by abstracting and indexing services and also accelerate the preparation of articles for online publication. The new guidelines will be provided in a separate mailing later on in 2017.

## Annual Review Report 2016 presents the following statistical data:

- ❑ **JOURNAL PAGE USAGE** (for both English [EN] and German [DE] platform language versions):
  - Product page – the main page of the journal, where the cover, description and supplementary materials are located.
  - Content pages – the archive, with issues and articles.

**Journal page usage** presents the numbers of visitors and page impressions:

- Page impression - the total number of times a specific website has been accessed. Page impression happens anytime a page is loaded through the browser.
  - Visitor - an individual user who has accessed the site; determined by the IP address of a computer or device that was used for browsing. If a visitor uses the same device each time to access a website, only one unique visit is counted.
- ❑ **EVENT USAGE** gives an overview about the clicks on buttons by users on journal pages: presents downloads of content, flyer, clicks on cite/export button as well as number of times users tried to register for alerts:
    - Clicks - the total number of times a specific button was clicked
    - Unique clicks - the total number of times a specific button was clicked by individual users (visitors).

Please note, that event usage provides data for Content Pages in English – C(EN). Data for German language version available upon request.

**2016  
USAGE  
STATISTICS**

JOURNAL PAGE USAGE	VISITORS	PAGE IMPRESSIONS
Product page	296 (EN), 22 (DE)	458 (EN), 27 (DE)
Content page	402 (EN), 14 (DE)	702 (EN), 19 (DE)
EN – English language version		
DE – German language version		

EVENT USAGE	CLICKS	UNIQUE CLICKS
