## Annual Review Report 2017 presents the following statistical data:

- ❑ **JOURNAL PAGE USAGE** (for both English [EN] and German [DE] platform language versions):
  - Product page – the main page of the journal, where the cover, description and supplementary materials are located.
  - Content pages – the archive, with issues and articles.

**Journal page usage** presents the numbers of visitors and page impressions:

- Page impression - the total number of times a specific website has been accessed. Page impression happens anytime a page is loaded through the browser.
  - Visitor - an individual user who has accessed the site; determined by the IP address of a computer or device that was used for browsing. If a visitor uses the same device each time to access a website, only one unique visit is counted.
- ❑ **EVENT USAGE** gives an overview about the clicks on buttons by users on journal pages: presents downloads of content, flyer, clicks on cite/export button as well as number of times users tried to register for alerts:
    - Clicks - the total number of times a specific button was clicked
    - Unique clicks - the total number of times a specific button was clicked by individual users (visitors).
